AMENDMENTS TO THE CLAIMS

Docket No.: 61842CIP(51035)

The following listing of claims will place all prior versions and listing of claims in the application.

 (Previously presented) A method for controlling spider mites in an agricultural crop, the method comprising:

applying an emulsion comprising an emulsifier, soap and at least 1.0% hop beta acids to the crop, wherein soap is present in an amount sufficient to reduce film in the emulsion.

(Previously presented) A method for controlling powdery mildew in an agricultural crop, comprising:

applying an emulsion comprising an emulsifier, soap and at least 1.0% hop beta acids to the crop, wherein soap is present in an amount sufficient to reduce film in the emulsion.

- (Previously presented) The method of claim 1 or 2, wherein the emulsion comprises about 0.5% liquid soap.
- 4. (Cancelled)
- (Previously presented) The method of claim 1 or 2, wherein the emulsion comprises about 0.2%, 0.4%, or 2% of an emulsifier.
- (Canceled)
- (Previously presented) The method of claim 1, wherein the method causes mite mortality.
- 8. (Previously presented) The method of claim 2, wherein the method reduces spore formation.

3

BOS2 805360.2

Supplemental Response dated October 13, 2010

- (Previously presented) The method of claim 2, wherein the method treats powdery mildew already present on the crop.
- (Previously presented) The method of claim 1 or 2, wherein beta acids are present at about 1% to 10%.
- 11. (Previously presented) The method of claim 1 or 2, wherein the emulsion is stable when stored.
- (Previously presented) The method of claim 1 or 2, wherein the emulsion is stable when diluted.
- 13. (Previously presented) A method for controlling spider mites in an agricultural crop, the method comprising:

applying an emulsion comprising an emulsifier, at least 1.0% hop beta acids, and 0.5% liquid soap to the crop.
